

ETERNAL DIGITAL ASSETS (EDA) PITCH DECK

OVERVIEW

Web3 domain names make crypto user-friendly and have the potential to underpin the next generation of multi-billion dollar businesses as Web2 domains did.

However, few dedicated Web3 domain trading platforms exist, and users lack the requisite tools to explore the full potential embedded in these assets.

NFT collectibles and art remain predominant in Web3, slowing the adoption of domains and other unique digital assets.

We are addressing this market gap with Eternal Digital Assets (EDA)

- Distribution of top-level domains (TLDs) and domain names
- Exchange
- Renting
- Website Builder

We will also explore other product lines, including tokenizer solutions, NFT and tokenized assets trading, and more.

WHY
ETERNAL DIGITAL
ASSETS ?

We created Eternal Digital Assets to drive Web3 adoption. There are currently over 400 million cryptocurrency investors, with just 3.5 million domain names created. Current top-level domains (TLDs) in the Web3 niche also fail to cover mainstream industries and are largely targeted toward crypto-native audiences.

Eternal Digital Assets is changing the narrative by distributing premium TLDs such as .youtuber, .disrupt, .myname, .ourname, etc. EDA provides a proprietary platform for users to trade, rent, and develop Web3 domain names. EDA will become a key market leader, promoting Web3 domains and facilitating the trading of these assets.

ETERNAL DIGITAL ASSETS OVERVIEW

Eternal Digital Assets has launched a premier marketplace for Web3 TLDs and domain names. We connect vendors with buyers through a user-friendly interface underpinned by smart contracts. The Web3 domain niche now has its first dedicated marketplace, thus attracting new investors to the space.

Eternal Digital Assets believes in inclusion and will expand its product lines to support trading NFTs and other tokenized real-world assets. We will organize extremely rare NFT mints and drive value for the Web3 economy through our suite of products.

EDA PLATFORM FEATURES

FOR ALL USERS:

MARKETPLACE: A clutter-free interface to buy and sell Web3 TLDs and domain names from popular providers. Support for NFTs and tokenized assets. An all-in-one marketplace for all your digital assets.

FIAT TO CRYPTO ON-RAMPS: Eternal Digital Assets will provide users the option to convert fiat to crypto for purchasing Web3 domains and TLDs.

MULTI-WALLET SUPPORT: Users can log in to the EDA platform with the most popular wallet options, Metamask, Coinbase Wallet, and WalletConnect.

EDA PLATFORM FEATURES

FOR VENDORS:

LIST SINGLE OR BULK DOMAINS: List single or multiple domains in a few clicks. Define price parameters and custom requirements for each domain.

MANAGE BUYER COMMUNICATION: Receive and manage buyer inquiries through an integrated chat solution on EDA.

TRANSACTION RECORDS: Review transaction history, profits calculations, and incoming orders, all on a user-friendly dashboard.

FEATURES CONTINUE

FOR BUYERS:

BROAD INVENTORY: Find an exhaustive listing of Web3 TLDs and domain names for your startup. Find hot potential domains to own before the Web3 boom.

CUSTOM FILTERS: Use custom filters and search tools to browse

SEAMLESS PURCHASES: Complete purchases in a few clicks and pay with either crypto or fiat.

DEVELOP: Set up a property on your Web3 domain in record time with support from our highly experienced team.

HARNESS THE FULL POTENTIAL OF YOUR WEBS DOMAINS WITH EDA

ECONOMICS

The project utilizes our native EDA token as a core component. Both buyers and vendors require EDA to access varying benefits and platform access.

TOKEN UTILITY — THE EDA TOKEN:

- Will be an accepted currency for buying and selling domains on the marketplace
- Will initially be used to incentivize trading on the platform and encourage vendors to grow their TLD ecosystem
- Enable priority listing for vendors
- Provide users tiered access to exclusive and extremely rare NFT mints when EDA launches its novel NFT launchpad
- Will facilitate staking rewards.

TOKEN DISTRIBUTION

DISTRIBUTION

TOTAL SUPPLY - 750,000,000 EDA

58% — Community

19% — Investors

15% — Founding Team

B% — Treasury

TOKEN ALLOCATION: TO BE DETERMINED

TOKENOMICS

BURN MECHANISM: The EDA token will be deflationary. Eternal Digital Assets spend a portion of the platform revenue (40%) on buyback and burns to reduce supply and strengthen EDA tokens.

MARKETING: EDA will publicly share Treasury and marketing wallets as funds will be used for marketing campaigns and PR.

THANK YOU

The potential for Web3 domains and digital assets is significantly under-tapped for the \$1 trillion cryptocurrency market.

Eternal Digital Assets is here to drive Web3 adoption and bring immense value to our backers.
